Art Unit: 3742

Applicant's election without traverse of Claims 1-10 and 21-30 in Paper No. 11 is acknowledged.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 8-10, 21-23, and 29-30 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Yang et al.(U.S.Pat 6,332,880).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4-7 and 24-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yang in view of Thompson et al.(U.S.Pat.6,048,329). Yang discloses a loop structure that shows many of the features of the claimed invention save the explicitly claimed flexible spline. Thompson discloses a catheter distal assembly that shows a flexible spline. It would have been obvious to one of ordinary skill in the art at the time of the claimed invention to use a flexible spline as taught by Thomson with the device of Yang to provide stiffness.

Art Unit: 3742

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Thompson'234, Biggs, and Snoke are cited to show structure similar to the claimed invention.
